* Blue color number turns into major resistance levels.

* Green color number currently acts as a support level.

2. FOCUS NUMBERS (intra-day Position trading)

Sell levels	Buying levels
1231.00 (First Sell#)	1220.25 (First Buy #)
1236.00 (Second Sell#)	1212.75 (second Buy #)

Trading rules for intra-day position trading:

1. **Dual number** could be used for long position when price trades above it. Also it could be used for short position when price trades below it. Inexperienced traders should not trade this number.
2. For intra-day position traders, you have the potential to capture a big move if you are trading in the right direction. If you get stopped out two times in one direction, especially during a strong trend day. **STOP** trading for rest of the day.
3. If you are a scalping trader, **DON'T** hold your position too long if you trading against the direction of a strong trend.
4. If you are in right direction of the market movement, you can hold your position until price hit opposite major resistance or support level target.

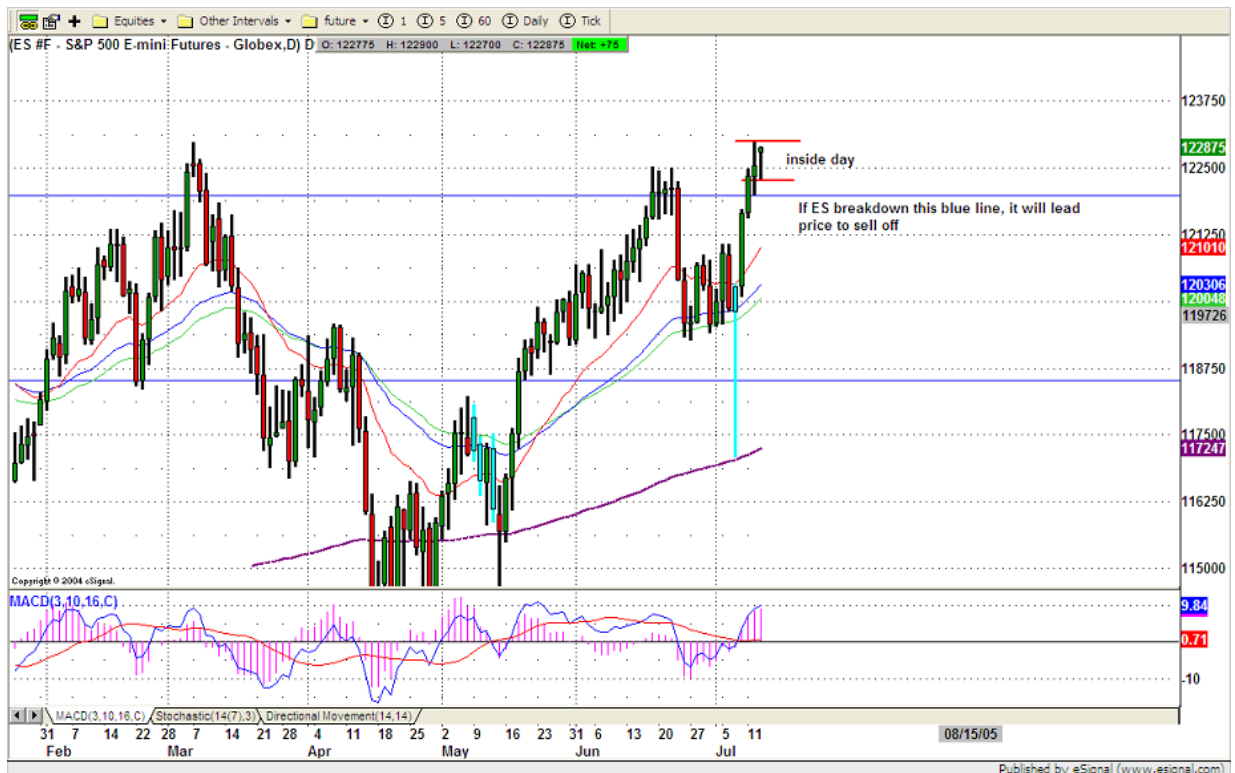

3. MAJOR RESISTANCE AND SUPPORT LEVELS FOR TODAY

Resistance	1230.25	1234.75	1238.50	1243.50	1246.75
-------------------	---------	---------	---------	---------	---------

Support	1224.50	1223.00	1218.25	1214.00	1210.50
----------------	---------	---------	---------	---------	---------

4. COMMENTARY

ES had an inside day (NR7). Even MOMO decreased, bulls still take a control in this market. If today ES can breakout 1228.50-1229.75 level, MOMO will pick up and push price into major resistance level to 1234.75-1235.25 level. If ES breakdown yesterday's low 1223 level, price would be push down to 1220-1217 level.

5. TODAY'S TRADING

Based on 30 mins chart, ES held itself well above 20ema line yesterday. If this morning, price can push through yesterday's high, MOMO could push price up to 1234.75 -1235.25 level. Based on yesterday's closing price, it is very possible for price to reach that level in the early morning trading session. After 11pm, I expect uptrend may change. Stay caution. If in the afternoon, ES breaks down yesterday's low 1223 level, price could dip into 1217 level or further to 1214-1212 level, which could be a U turn and strong trend day
