5. COMMENTARY

Last day of Feb, ES closed slightly above its monthly open price and made its no-decision doji pattern on the monthly chart. Trend is in changing process. MACD shows market is lacking of Momentum, SST shows market is in monthly overbought situation. Little divergence has been showed on SST indicators. Pullback into 20-weekly moving average line should be expected in the future monthly.

Daily chart of ES, ES broke down its major support zone around 1285.25-1287.50 levels. It closed below its 20 daily moving average line, but above its 40 daily moving average line. Whether down movement can go through today or not, it depends on today's movement. If ES can move up 1283.25 level, retesting broken down line should be expected. But selling will increase as soon as price moves into 1289-1287 range.

6. TODAY'S TRADING

Based on 60mins chart, based on yesterday's closing price, today first hour consolidation should be expected. After ES finds its balance level, downside movement could be resumed again. Short on Bounce

We are looking for bounce area. 1287.50-1286.50 is yesterday's breakdown level, 1290 is natline breakdown level. Either or both of those two levels could be retested Today. Short on those levels. And targets for 1279.75-1278.75 and 1273.75 (max).

Good Luck
