## 5. COMMENTARY

ES held itself well above breakout level. Today is last day for ES to make a final decision which direction it will go next two weeks. It is possible for ES to move up to form yearly double top if ES can close above 1305 today.

All daily indicators are bullish and currently still support price.

## 6. TODAY'S TRADING

Based on 60 mins chart, ES made high first in the morning trading, then reversed after 1pm. Today ES could go little bit down further if 1295.50 level fails to hold. But any dip will attract buyers due to daily bullish indicators.

Today I plan to do all scalping trading. First morning, if Gap up, I look for 1305 or 1309.75 level for scalping short trading. If gap down, I look for 1295.50 and 1290.50-1291.75 level for scalping long trade.

In short timeframe, ES is in overbought area. Pullback should be expected.
