4. DAILY OUTLOOK

ES just pulled back for testing previous resistance level. If today ES still can close above 1062.50 line, it means the 3rd wave of subwave 3 still hasn't completed yet. It is likely for price to move higher. A move below 1050 will be negative and a further down toward 1044 direction would be expected. Yesterday the market showed a little sign of waning on the upside, but other indicators remains strong. Due to option expiration, ES may well be held up for today and next Monday, and then selloff after those days.

ESZ9 DAILY Chart

5. TRADING STRATEGY FOR Sept. 18, 2009

Yesterday ES made a minor correction and pulled back to the breakout line 1056 area. Today if ES can hold price above 1055-54 range overnight (long), it is likely for price to move back to yesterday's high area or little higher to 1075 area (short). Quadruple witch day --- anything can happen. Trade with caution! Newbie should stay on the sidelines.
